SUMMARY

Full Stack Developer with 4+ years of experience building scalable and secure enterprise-grade web applications. Proven expertise in Angular, Node.js, and TypeScript with hands-on contributions to projects in fintech, banking, and multi-tenant SaaS platforms. Strong problem-solver with experience integrating government APIs (UIDAI), video KYC, and secure payment gateways.

TECHNICAL PROFICIENCIES

Frontend: Angular, JavaScript, TypeScript, React, HTML, CSS, RXJS, Angular Material, Ionic, PrimeNG, Bootstrap

Backend: Node.js, Express.js, TypeScript

Databases: MySQL, MongoDB

Other Tools: GitHub, Bitbucket, MongoDB Atlas, Postman, Jira, Confluence, MySQL Workbench

EXPERIENCE

Software Engineer | *Mindrops Solution PVT LTD* | May 2023 – current

- Integrated a calendar with three views: day, week, and month, enabling admins to view, edit, and manage appointments, including drag-and-drop functionality for adjusting appointment times and statuses.
- Implement Azure authentication for handling login and logout events for authenticated users.
- Developed a comprehensive dashboard highlighting data in charts and tables.

Associate Software Engineer | *Decimal Technology* | June 2021 – April 2023

- Developed secure and reliable web applications for banking sector companies.
- Integrated features like eKYC, vKYC through implementing government API's like UIDAI API for Aadhaar details, etc.
- Worked with India's leading banks for their secure applications.

PROJECTS

Appointment Booking System:

- Appointment Booking System with distinct modules for Admin and Customer, supporting multi-tenant architecture for use across various businesses.
- Enabled multi-tenant configuration, allowing different businesses to customize and configure the application to suit their specific needs.
- Implemented customizable customer portal settings through the admin module, providing flexibility in how the application is tailored for different users.
- Designed and managed features for admin users, including staff, rooms, and exam scheduling, with options to set availability times, handle absences, and configure dynamic weekly practice hours.

Open Savings Account:

- Contributed to the development of a savings account opening platform for a leading bank, focusing on user-friendly onboarding processes.
- Implemented government APIs for PAN and Aadhaar validation, ensuring regulatory compliance and enhancing account security.
- Integrated a secure payment gateway to facilitate smooth transactions during the account opening process.
- Integrated a third-party video KYC (vKYC) portal, enabling remote verification of customer identity.

Check ATM Transaction:

- Developed a comprehensive software solution that tracks all ATM transactions, awarding points based on transaction activity.
- Implemented a point redemption system allowing users to convert earned points into cash deposited directly into their bank accounts.
- Designed and built an intuitive dashboard providing an overview of customer data, including transaction history and point balances.

EDUCATION

Master of Computer Application (MCA) *Indira Gandhi National Open University, Delhi*

2021-2023

Bachelor of Computer Application (BCA) *Lingaya's Vidyapeeth, Haryana, Faridabad*

2018-2021
