SUMMARY

Full-stack developer with 4+ years of experience building scalable and secure enterprise-grade web applications. Proven expertise in Angular, React, Node.js, and TypeScript with hands-on contributions to projects in fintech, banking, and multi-tenant SaaS platforms. Strong problem-solver with experience integrating government APIs (UIDAI), video KYC, and secure payment gateways.

TECHNICAL SKILLS

Frontend: Angular, React, JavaScript, TypeScript, HTML, CSS, RXJS, Angular Material, Ionic, PrimeNG, Bootstrap, Tailwind, PrimeFlex, Shadch, NGRX, Redux Toolkit, Micro-Frontend

Backend: Node.js, Express.js, JavaScript, TypeScript, Microservices, Multer, Axios, Socket.io

Databases: MySQL, MongoDB, Sequelize, Mongoose

Others: Git, Postman, Jira, GitHub, Bitbucket, CI/CD, Cursor, Lovable

EXPERIENCE (4+ Years)

Senior Software Engineer | *Mindrops Solution PVT LTD* | May 2023 – Sep 2025

- Leveraged AI-powered code editors and documentation tools to optimize API development workflows, resulting in an 80% boost in productivity and enhanced code consistency.
- Integrated a calendar with day, week, and month views, enabling admins to manage appointments with drag-and-drop functionality, improving scheduling efficiency by 70%.
- Developed a data-driven dashboard showcasing critical metrics via charts and tables, improving data visibility for stakeholders by 60%.

Associate Software Engineer | *Decimal Technologies* | June 2021 – April 2023

- Developed secure and reliable web applications for banking sector companies.
- Integrated eKYC and vKYC features by implementing government APIs (e.g., UIDAI for Aadhaar validation), reducing manual verification efforts by 90%.
- Upgraded an Angular project from version 9 to 14, enhancing performance and ensuring long-term maintainability.

PROJECTS

Appointment Booking System: Technologies - Angular, NodeJS, MongoDB, TypeScript, ExpressJS, Azure

- Appointment Booking System with distinct modules for Admin and Customer, supporting multi-tenant architecture for use across various businesses.
- Developed a drag-and-drop functionality for appointment adjustments, improving usability by 70%.
- Enable customizable customer portal settings through the admin module, providing flexibility in tailoring the application to meet the needs of different users.
- Designed and managed features for admin users, including staff, rooms, and exam scheduling, with options to set availability times, handle absences, and configure dynamic weekly practice hours.

Open Savings Account: Technologies - Angular, NodeJS, MySQL, TypeScript, ExpressJS, GitHub CI/CD

- Contributed to the development of a savings account opening platform for a leading bank, focusing on user-friendly onboarding processes.
- Implemented government APIs for PAN and Aadhaar validation, ensuring regulatory compliance and enhancing account security.
- Integrated a secure payment gateway to facilitate smooth transactions during the account opening process.
- Integrated a third-party video KYC (vKYC) portal, enabling remote verification of customer identity.

Check ATM Transaction: Technologies - React, NodeJS, MySQL, TypeScript, ExpressJS

- Developed a comprehensive software solution that tracks all ATM transactions, awarding points based on transaction activity.
- Implemented a point redemption system allowing users to convert earned points into cash deposited directly into their bank accounts.
- Built an intuitive dashboard displaying transaction history and balances, improving customer engagement by 50%.

EDUCATION

Master of Computer Application (MCA) | *Indira Gandhi National Open University, Delhi*

2021-2023

Bachelor of Computer Application (BCA) | *Lingaya's Vidyapeeth, Haryana, Faridabad*

2018-2021
