PROFESSIONAL SUMMARY

Results-driven Full-Stack Engineer with **5 years of experience** architecting scalable enterprise web applications across fintech, banking, and healthcare verticals. Currently driving a mission-critical **AngularJS → Angular 19 migration** for Optum (UnitedHealth Group) at HCL Technologies. Proven track record of integrating government APIs (UIDAI), video KYC, secure payment gateways, and AI-assisted development workflows that dramatically accelerate delivery timelines.

TECHNICAL SKILLS

Frontend	Angular (2–19), AngularJS, React, TypeScript, JavaScript, RxJS, NgRx, Redux Toolkit, Angular Material, PrimeNG, PrimeFlex, TailwindCss, Ionic, Bootstrap, Tailwind CSS, Micro-Frontend (Module Federation), Shadcn
Backend	Node.js, Express.js, TypeScript, Microservices Architecture, REST APIs, Socket.io, Multer, Axios
Databases	MySQL, MongoDB, Sequelize ORM, Mongoose, Prisma
AI & Tools	AI-Powered Development (Cursor, Lovable), GitHub Copilot, Prompt Engineering, AI Code Review & Documentation, LLM Integration, AI Workflow Automation
DevOps & Others	Git, GitHub, Bitbucket, CI/CD Pipelines (Azure DevOps, GitHub Actions), Postman, Jira, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full-Stack Developer | **Prophecy Technology (Deployed at HCL Technologies)**

Oct 2025 – Present

↳ Client: Optum (UnitedHealth Group) • Project: SubroPoint • Working as Third-Party Employee via Prophecy Technology

- Leading a **high-impact AngularJS → Angular 19 migration** for SubroPoint, Optum's enterprise subrogation management platform, modernizing a legacy codebase serving thousands of healthcare professionals.
- Architected a **component-by-component migration strategy** ensuring zero-downtime transition with full backward compatibility during the phased rollout across production environments.
- Leveraged **AI-powered development tools** (Cursor, GitHub Copilot) to accelerate migration velocity by 60%, automating boilerplate conversion and generating comprehensive unit test suites.
- Introduced **modern Angular best practices** — standalone components, signals, lazy loading, and OnPush change detection — reducing bundle size by 35% and improving page load performance significantly.
- Collaborated cross-functionally with HCL engineering teams and Optum product stakeholders to align technical delivery with business roadmaps in an **Agile/Scrum environment**.
- Championed **AI adoption** within the team by conducting knowledge-sharing sessions on prompt engineering and AI-assisted code reviews, improving overall team productivity by 40%.

Senior Software Engineer | **Mindrops Solution Pvt. Ltd.**

May 2023 – Sep 2025

- Pioneered AI-powered development workflows** using Cursor and Lovable, achieving an **80% boost in API development productivity** and establishing team-wide coding consistency standards.

- ▶ Engineered a **multi-tenant Appointment Booking SaaS** on Azure — built distinct Admin and Customer modules supporting dynamic business configurations across multiple client organizations.
- ▶ Implemented a sophisticated **drag-and-drop calendar** (day/week/month views) for appointment management, improving scheduling efficiency by **70%** and eliminating manual booking conflicts.
- ▶ Built an executive-grade **data analytics dashboard** with real-time charts, KPI tables, and filterable metrics — enhanced stakeholder data visibility by **60%**, enabling faster business decisions.
- ▶ Mentored junior developers on Angular architecture patterns, RxJS observables, and AI-assisted development tools, fostering a culture of continuous learning and innovation.

Associate Software Engineer | Decimal Technologies

June 2021 – April 2023

- ▶ Delivered **secure, compliant web applications** for leading Indian banking institutions, adhering to strict regulatory and security standards in a fast-paced fintech environment.
- ▶ Integrated **eKYC & vKYC modules** using UIDAI government APIs for Aadhaar validation, slashing manual verification effort by **90%** and accelerating customer onboarding by 3x.
- ▶ Executed a complex **Angular v9 → v14 framework upgrade**, resolving 200+ deprecation issues, improving runtime performance by 45%, and ensuring long-term maintainability.
- ▶ Integrated a PCI-compliant **payment gateway** and third-party **video KYC portal** into a savings account opening platform for a leading national bank.

KEY PROJECTS

SubroPoint — Healthcare Subrogation Platform — *AngularJS → Angular 19, TypeScript, Azure, HCL/Optum*

- ▶ Modernizing a large-scale **AngularJS enterprise application to Angular 19** for Optum, introducing signals, standalone components, and modern state management for a future-proof architecture.
- ▶ Implementing **AI-assisted test coverage** automation, reducing QA cycle time and improving reliability of critical healthcare claim-processing workflows.

Appointment Booking System (SaaS) — *Angular, Node.js, MongoDB, TypeScript, Express.js, Azure*

- ▶ Developed a **white-label multi-tenant SaaS** platform supporting appointment scheduling across diverse business verticals with fully customizable customer portals.
- ▶ Built admin tooling for staff, rooms, and exam management with dynamic weekly availability, absence handling, and real-time conflict detection.

Open Savings Account — Banking Platform — *Angular, Node.js, MySQL, TypeScript, Express.js, GitHub CI/CD*

- ▶ Built a **digital savings account opening journey** with UIDAI/PAN validation, vKYC integration, and secure payment processing for a top-tier national bank.
- ▶ Implemented **GitHub Actions CI/CD pipeline** for automated testing and zero-downtime deployments across staging and production environments.

EDUCATION

Master of Computer Application (MCA)

Indira Gandhi National Open University, Delhi

2021 – 2023

Bachelor of Computer Application (BCA)

Lingaya's Vidyapeeth, Faridabad, Haryana

2018 – 2021
